

Hi, my name is Michael Craig. I've lived in Summit County for 34 years. 30 of those years I had a wonderful job as a firefighter. I first came to Auth Chiropractic after having an accident in the fire department and had neck pain and just wanted to come in and see if I could get a more natural treatment to avoid any surgeries or anything like that. Dr. Auth diagnosed me with spinal stenosis; I had some narrowing between the discs in my neck around C5 and C6. I decided that trying to regenerate those discs would help and it certainly has.

I just came back from three weeks in Hawaii where we paddled, we swam, we scuba dove, and played two rounds of golf...with no adverse effects from it at all. My initial experience would be described as incredible. The very first treatment I began to feel relief from the numbness and tingling in my fingers. I'd show up here to this wonderful welcoming group of people, get on the DRS table. What it does is cradles the back of my head, at a certain angle and a certain amount of pressure, and that pressure is oscillated stronger and less 18 to 20 times. And it just, you can just feel it relieving the pressure, relieving any nerve pressure, anything like that, on my spinal column.

If anyone is even considering other therapies, I strongly recommend to them that they go through the DRS Protocol first. It's completely taken the idea of any kind of surgery or anything out of my thought process...to seek out someone that offers this sort of therapy because it's wonderful and definitely has great results!
