

Transcript for T. Golden Testimonial Video

I'm Terri. I first came to Dr. Auth because of cervical discomfort and headaches. I have been diagnosed with cervical stenosis, some degeneration of a couple of vertebra in my cervical spine. DRS seemed to be the right choice for me because I had tried conventional chiropractic care, and the effects were temporary. When I come in to see Dr. Auth, I first begin on the roller table-which feels awesome. Then next I am taken into the back room for the DRS Table. I'm on the table for 25 minutes. My first experience on the DRS Table I was expecting to feel the machine actually elongating my body, but I actually felt nothing. And it was very soothing and relaxing, good temperature, good music in the back, most of the time I do fall asleep.

After the DRS table, then I lie down face down on my stomach and I'm given electrostimulation of four quadrants on my traps, with ice for ten minutes. Then I leave and I'm as good as new again.

I think as far as improvement, percentage-wise, from when I first began DRS until today, I would say I'm 95% better. It has really improved the quality of life for me. I would highly recommend the DRS Protocol to someone who is suffering from chronic discomfort. You have nothing to lose, and lots of comfort to gain.
